Full Stack Developer by way of a career tending bar, operates with the rigorous consistency under pressure crucial to that field. Graduate/certificate-holder of the University of Utah's Web Development Bootcamp, dreams of robust, elegant code and subtly elegant boxes on screens. Mongo (or SQL), Express, React, Node. From scratch, recently wrote a stack (MERN with Apollo/graphQL) that functions as a setlist app for musicians, available to use online. This app is to be further developed in two new directions: one, as a barbershop's appointment calendar, the other as an insurance broker's eCommerce platform.
